PILOT PROJECT

Welcome to Baltimore's Harlem Park Agrihood

INNOVATION MEETS URBAN 'GOLD'...

...repurposing found materials for building urban farm infrastructure to improve fresh food access and food security.

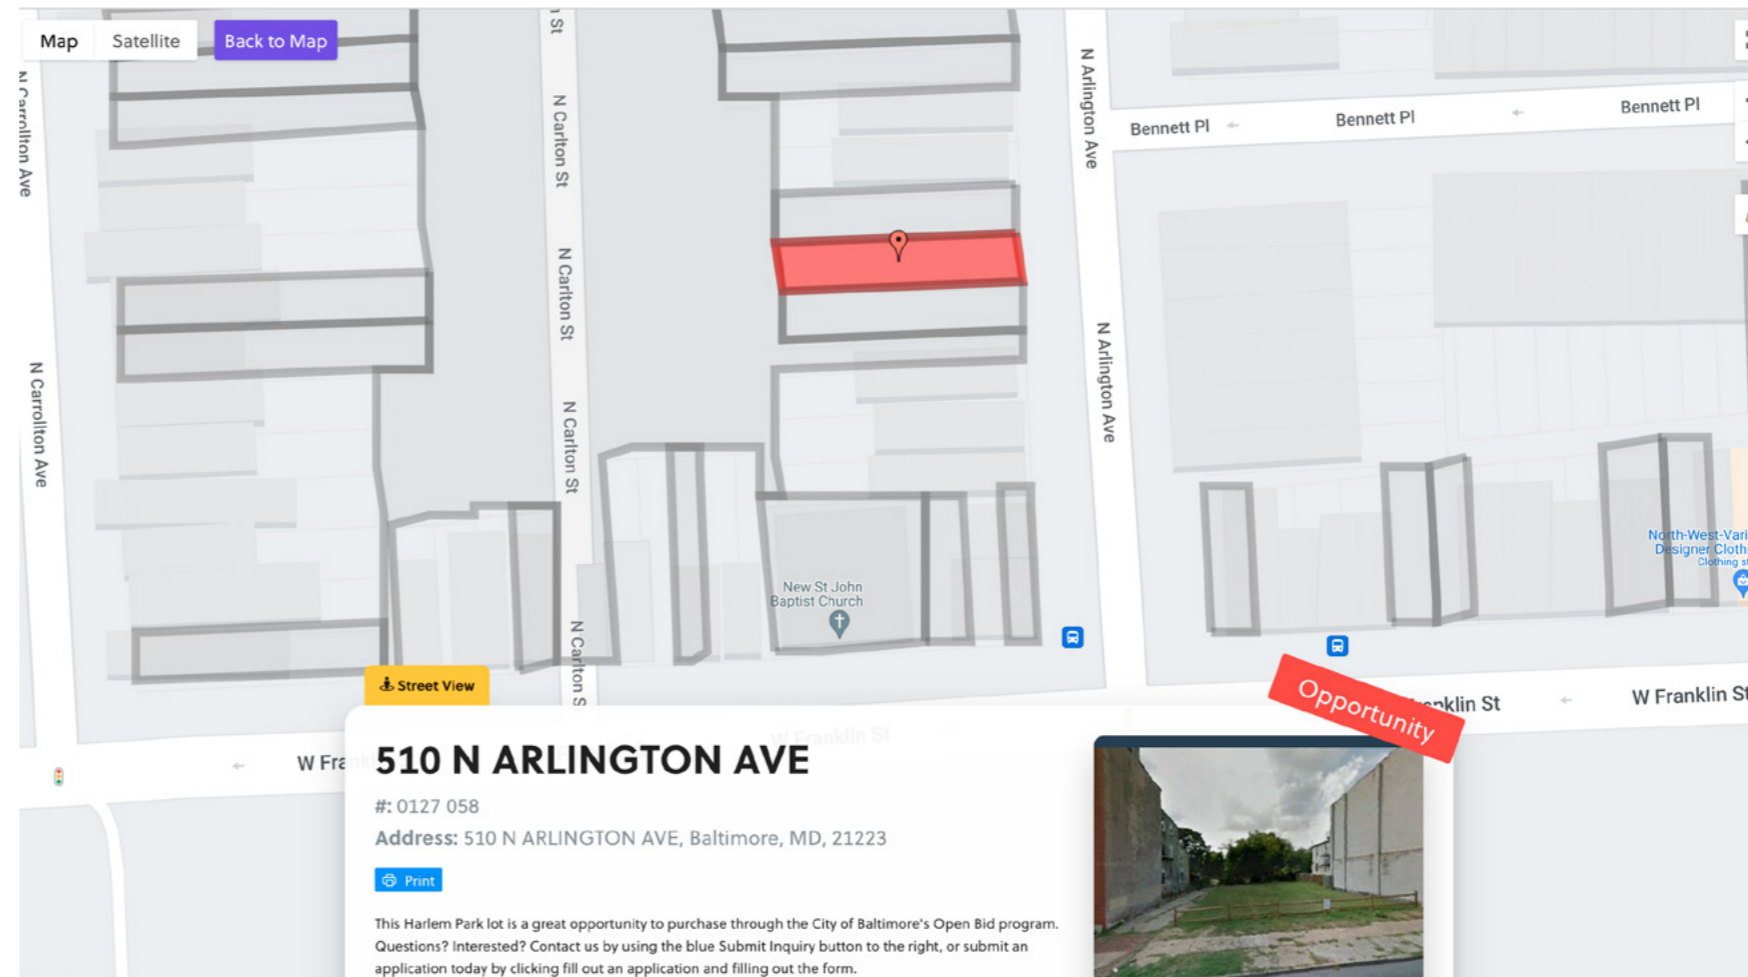

SOLUTION

Provide access to empower the locals to obtain transferable skills e.g. learn how to grow food, compost, and build low-cost/no-cost structures (raised beds, mini-greenhouses) for self-supporting farm infrastructure.

CLIENT

Local citizenry of Harlem Park in SOWEBO

Opportunities once considered politically impossible are now politically inevitable for marginalized communities.

SERVICE OFFERING

Local, pesticide-free, on-site, fresh food production

SCALABLE SOLUTION

Year round, geographically predisposed food production based on the community's needs and wants. Growing food that is tuned to adapt and survive the escalating 'indifference' and 'undesireables' of Mother Nature using biointensive growing techniques (intercropping, square foot gardening, natural pest control, vermicomposting).

BUDGET

\$TBD

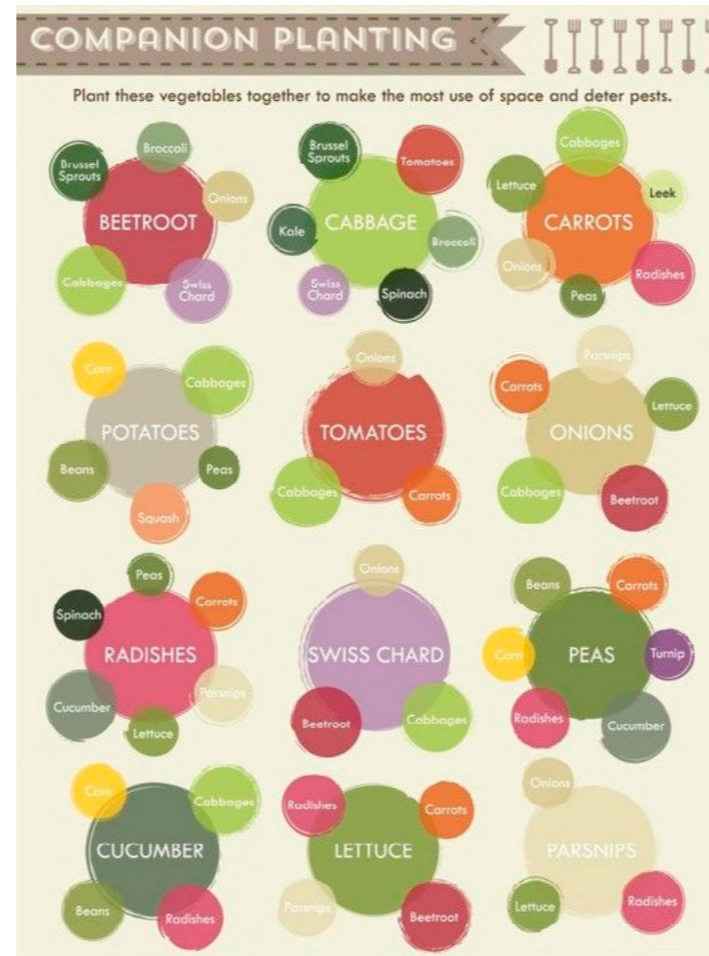

GOAL

Provide ready, fresh food access to the 500th Street Block, N. Arlington, Harlem Park Neighborhood

MOTO

Everyday brilliance for disaster resilience. that is cultivating the riches of less...

- 20%** carbon sequestered
- 162 lbs** produce/month/person (goal)
- ~20,000** lb food/year yield
- 10** persons fed by 0.12 acre
